The Supersealer MBS is our flagship sealer for the medical industry. We have partnered with Code Tech and Keyence to fulfill FDA compliance dates for UDI requirements.

The Supersealer MBS, Medical Band Sealer is a rotary band sealer designed to meet ISO11607-2, ISO13485, ISO9001 and EN868 standard requirements for the medical industry. The Supersealer MBS continuously seals a wide range of medical packaging materials including Plastic, Tyvek, Mylar, Pet, Coated Tyvek, paper and plastic, laminated foil and metalized foil bags. With its stainless steel construction, a motorized Pedestal, a sensor for broken bands and a wrinkle detector, the Supersealer MBS offers the best control package for the Medical companies on the market today. The PLC controller monitors variables at all times, the touch-screen enables access to all information required for calibration and validation; change of the machine settings is as easy as a touch of a button. The machine comes standard equipped with an external Ethernet port for accessing the PLC and a USB port to allow users to download data logging batch data onto a USB memory stick.

OKI looked at several solution providers for our customers' UDI print requirements on our Supersealer MBS sealer and quickly realized that Code Tech's iJET had several unique features that provide a competitive advantage to them. The iJET is a self-contained print module that requires no additional control box or operator interface, and is the only HP print system that uses the Ethernet port to provide power to both the printer and the vision system, while simultaneously allowing seamless data communication between the sealer, the vision system and the printer. This drastically reduces the cost of integration and allows the Supersealer's HMI/GUI to control both the printer and camera from a single point.

Our MISSION

PRODUCT MANAGER AND VICE PRESIDENT:
ANN MARIE KELLETT

"Brands are built on what people are saying about you, not what you are saying about yourself"

Throughout the years OK International has strived to be different and unique compared to our competitors. We have really listened to our customers and prospects who want their packaging needs to be taken care of in the best possible way, in an efficient, but still the most cost effective way. As OKI has always said; **"Brands are built on what people are saying about you, not what you're saying about yourself"**. With this package, the Supersealer MBS and the Code Tech iJET with Keyence scanner customers will be able to package their products in the most reliable and cost effective way, meeting the compliance dates for UDI requirements.
